

EB-305 Energy Balancer - Detoxification Footbath

- Designed and developed to restore the body's energy and balance while facilitating and aiding in its natural detoxification process
- Proven in clinical trials to balance and restore the body's Ph and electromagnetic energy
- State-of-the-art research and development used to provide a form of energy that the body can readily use "Bioenergetic/LifeEnergy."

What it does

The EB305 has been shown in clinical trials using electro dermal scanning to improve and balance the body's energy channels or meridians. These meridians begin or end on the feet or hands and provide a pathway for energy to flow to or from a particular organ (i.e., liver, kidney, etc.). A person's current state of health is determined by how well energy flows through these meridians or channels.

The EB has also shown in clinical trials to change and balance the body's pH. Balancing the body's pH is critical in assisting the body in every aspect, from its ability to detox to its ability to digest.

How it works

The EB305 uses direct current to create an ionic energy field in the foot bath similar to the energy produced by the human body. This energy is sub-threshold, meaning that the patient generally will not feel the treatment. The EB305 creates energy by altering the electron and proton load in the water to create an electromagnetic field (“Bioenergetically”) altered water environment. The patient places their feet in the “Bioenergetic” water to receive the flow of appropriate ions. The energy flow from the EB3-4 increases the body’s energetics or simply translated “Life-Energy.”

This sub-threshold energy is very similar to microcurrent or cold laser therapy, both of which have been proven to increase and create more cellular ATP, more commonly known as cellular energy. This increase in cellular ATP allows the cells to work and detoxify at a higher rate. Working at a higher rate enhances the cells to withstand stressors, both physical and chemical.

What you may experience

Healthy individuals can expect to feel lighter, more energy, and experience a greater feeling of wellbeing. Some patients with pain, edema, gout, headache, and swollen joints have reported immediate relief. Other patients with arthritis, allergies, lymphedema, neuralgia, and other symptoms have experienced relief and benefits with multiple treatments.
